Education

SRM Institute of Science and Technology

B.Tech in Computer Science and Engineering

Aug 2023 – May 2027

CGPA: 8.23 / 10

INTI International University

Semester Abroad Program

Aug 2025 – Dec 2025

CGPA: 3.19 / 4

Projects

Itinera AI — Smart AI Travel Planning Platform

- Developed a GenAI-powered travel planning platform that transforms natural-language trip requirements into structured, personalized day-by-day itineraries.
- Built an interactive user-facing AI application with customizable schedules, companion preferences, budget analysis, destination weather recommendations, and multi-currency conversion.
- Implemented schema validation and fallback handling to ensure reliable AI-generated outputs, with session persistence and PDF/text export for end-to-end itinerary management.

IPLytics — AI-Powered IPL Analytics Platform

- Developed an AI-powered analytics platform for player, team, and venue performance analysis using historical IPL match and ball-by-ball datasets.
- Processed and analyzed structured cricket data using Pandas and built interactive Streamlit and Plotly dashboards for player comparisons, team insights, and venue-based analysis.
- Integrated a natural-language AI interface to query analytical data and generate data-backed insights, enabling intuitive consumption of complex statistics.

Age and Gender Estimation using Dental X-Rays

- Developed a computer vision pipeline for age estimation and gender classification from panoramic dental X-ray images.
- Applied image preprocessing and feature extraction techniques to transform raw medical imaging data into inputs suitable for machine learning models.
- Evaluated regression and classification approaches and analyzed model performance across age prediction and gender classification tasks.

Skills

Programming: Python, SQL

AI: Gen-AI, Agentic AI, Large Language Models, RAG, Prompt Engineering, Machine Learning

Data & Analytics: Pandas, NumPy, Data Analysis, Data Visualization, Data Preprocessing

Development: Streamlit, React, FastAPI, MongoDB, API Integration

Tools: VS Code, GitHub, Android Studio, Google Colab, Cisco Packet Tracer

Certifications

MongoDB Associate Developer Learning Path (MongoDB)

- Learned MongoDB fundamentals including documents, collections, fields, CRUD operations, and database management concepts using MongoDB Atlas.

CCNA: Introduction to Networks (Cisco Networking Academy)

- Learned fundamentals of computer networks, IP addressing, network models, protocols, ports, and gained hands-on experience with Cisco Packet Tracer.
