Education

SRM Institute of Science and Technology

B.Tech in Computer Science and Engineering

Aug 2023 – May 2027

CGPA: 8.23 / 10

INTI International University

Semester Abroad Program

Aug 2025 – Dec 2025

CGPA: 3.19 / 4

Remote Internship

Salesforce Intern

May 2025 – Jul 2025

- Gained hands-on experience with Salesforce platform tools, workflows, and CRM concepts.
- Learned Salesforce features including automation processes and data management.
- Understood how enterprise applications manage customer-related processes.

Projects

Itinera AI — Smart AI Travel Planning Platform

- Engineered an interactive travel itinerary platform featuring customizable day-by-day scheduling, companion filters, and interactive budget breakdown charts.
- Integrated real-time multi-currency conversion, automated destination weather advice, and interactive packing checklists with live progress tracking.
- Implemented crash-proof schema validation and local session persistence for saving, reloading, refining, and exporting travel plans to PDF or text.

IPLytics — AI-Powered IPL Analytics Platform

- Developed an AI-powered analytics platform for IPL player, team, and venue performance analysis using historical match and ball-by-ball data.
- Designed interactive dashboards using Streamlit and Plotly with player comparisons, team insights, and venue-based analytics.
- Integrated AI to enable natural language querying and generate data-backed cricket insights.

Age and Gender Estimation using Dental X-Rays

- Developed a computer vision pipeline to estimate age and classify gender from dental X-ray images.
- Applied image processing techniques, such as grayscale conversion, image enhancement, and feature extraction.
- Built machine learning models for age prediction and gender classification.

Skills

Languages: Python, SQL

Frameworks & Libraries: Pandas, Numpy, Streamlit, Plotly, MongoDB, React

Tools: GitHub, Android Studio, VS Code, Cisco Packet Tracer, Figma, Canva, MS Office

Certifications

CCNA: Introduction to Networks (Cisco Networking Academy)

- Gained practical knowledge in network architectures, models, IP addressing, and Ethernet concepts.

MongoDB Associate Developer Learning Path

- Gained hands-on knowledge of MongoDB, including CRUD operations, schema design, indexing, aggregation pipelines, and database optimization for modern applications.
